I. write the topic on the black board and draws the cuboid structure

Black - Board writing
Explanation

Student observe the topic and write down in the notebook and observe the box.

Surface area is made up of how many rectangle?

II - Explains the length breadth and height

Black - Board writing.

Student observe the topic.

III - Explains the formula with the steps.

Black - Board writing.

Student observe the steps and write it in their Notebook.

what is the formula to find the surface area of a cuboid?

- 1st - $l \times b$
- 2nd - $l \times b$
- 3rd - $l \times b$
- 4th - $l \times b$
- 5th - $b \times h$
- 6th - $b \times h$

Topic - Surface area of cuboid.

दिनांक : 25/02/2023

Surface area of cuboid:
The outer surface of a cuboid is made up of six rectangles.

Formula :-

$$= 2[(l \times b) + (b \times h) + (h \times l)]$$

$$= 2(15 \times 10) + (10 \times 20) + (20 \times 15)$$

$$= 2(150 + 200 + 300)$$

$$= 2 \times 650$$

$$= 1300.$$

ACKNOWLEDGEMENT

I would like to thank the almighty lord for showering his choicest blessings.

I would like to thank to Savitribai Phule Pune University which gives an opportunity to learn about different subjects in B. Ed course.

I would like to thank to my guide teacher Prof. for her valuable guidance and co-operation and our principal Dr. Bhushan Kardile Sir of K.K. Wagh College of Education.

My sincere thanks to our Librarian for providing us the reference book.

I would also like to thank the school Principal Chitra Ma'am who support us and guided in our intern period. And also the school teachers who helped us during this Internship period.

INTRODUCTION

According to the new syllabus of B.Ed Course 207: Teaching Competency every year we have internship for few months.

In this time period we are allotted with different types of work like taking lesson, conduct unit test, prepare blue print, Unit plan etc apart from this we also have to plan different activities and competitions in the school and conduct it. we also have to keep information of official records such as having certificate, medical checkup of the students cumulative records.

In this way we get training of working actually with the school atmosphere and a experience working and the expert teaching staff of the school.

आशय / पाठ्यपुस्तक
(पाठ्यमुद्यांबरोबरच त्यातील संबोध नोंदवावेत)

आधार प्रणाली / शैक्षणिक साधने

Knowledge:
Students tell the variable in the equation and find the value.

Knowledge:
Student tell the given thing from example.

Understanding
Student tells the step to find out the solution of equation in one variable.

$$4x = 8$$

Ex. Solve the following equation.

$$2(x-3) = \frac{3}{5}(x+4)$$

$$2(x-3) = \frac{3}{5}(x+4)$$

Multiply both sides by 5

$$10(x-3) = 3(x+4)$$

$$10x - 30 = 3x + 12$$

Adding 30 both sides.

$$10x - 30 + 30 = 3x + 12 + 30$$

$$10x = 3x + 42$$

Subtracting 3x from both sides.

$$\therefore 10x - 3x = 3x + 42 - 3x$$

$$7x = 42$$

Dividing both sides by 7.

$$\frac{7x}{7} = \frac{42}{7}$$

$$\therefore \boxed{x = 6}$$

घटक / उपघटक - Equation in one variable

अध्यापन पद्धती / प्रकार - Deductive Method.

पूर्वज्ञान - Students know about the solution of one variable.

पाठमुद्दे - Solution of one variable - Word Problem.

गाभा घटक (मूल्ये) - Scientific attitude, Neatness, Gender Equality, Scientific temper.

संबोध / तत्वे / नियम -

सज्जता प्रवर्तन - Teacher - Student yesterday we are going to learn about the solution of one variable. How many variables given in eqn: $8m - 1 / 2m + 3 = 2$
Student - One variable i.e. m
Teacher - Very Good.

हेतूकथन - So today we are going to study about the word problem solution related to one variable. This topic

उद्दिष्ट्ये व स्पष्टीकरणे

आशय / पाठ्यपुस्तक
(पाठ्यमुद्यांबरोबरच त्यातील संबोध नोंदवावेत)

आधार प्रणाली / शैक्षणिक साधने

Knowledge:
Student tell the how the information given in word problem can be converted into algebraic expression using variable.

Q.) My age is 'x' years.
My father's age is 32 years more than my age.
 \therefore Father's age \square yrs.
• My Grandmother's age is 10 more than 4 times my age. \therefore Grandmother age is $(4x + 10)$ yrs.
• My sister's age is 4 less than my age.
 \therefore Sister's age \square yrs.
• My mother's age is 3 times my age.
 \therefore Mother's age \square yrs.

Knowledge:
Student tells the number in the boxes.

Activity - write correct number in the boxes given length is 3 times of breadth.

I am rectangle
my perimeter 40 cm
breadth x

Perimeter of the rectangle = 40.

$$2(\square x + \square x) = 40$$

$$2x \square x = 40$$

$$\square x = 40$$

$$x = \square$$

Teacher write the topic on the Black-Board.	Black-Board Writing	Student observe the topic and write it in the notebook	
Q4- ask the variable in the given equation	Questioning	Student tell the variable x .	If grand father's age is 20 times more than 4 times my age find the eq ⁿ s of a question given word problem
Q4- ask the student tell the Equation from the word problem	Explanation Questioning	Student tell the equation from the word's problem $x + 32$ $x - 4$ $3x$ student tell the answer correctly.	
Q4- ask to student what is given and what is to be found out?	Questioning	Students tell the answer correctly	Find the length and breadth after making a equation from given figure
Q4- tells to student steps to find out the numbers in the boxes.	Explanation	Perimeter of the rectangle = 40 $2(3x + 4x) = 40$ $2 \times 7x = 40$ $14x = 40$ $x = 5$ Breadth of rectangle = 5 cm and length of Rectangle = 15 cm	Length is 2 times of breadth <div style="border: 1px solid black; padding: 5px; width: fit-content;"> Rectangle Perimeter is 20 </div>

Unit - Equation in one variable.

Perimeter of Rectangle = 40cm

$$2(13x + 1x) = 40$$

$$2 \times 4x = 40$$

$$6x = 40$$

$$x = 5$$

∴ Breadth of Rectangle = 5 cm

∴ length of Rectangle = 15 cm

गुणात्मक बाबी

- Introduction based on previous knowledge.
- Tr explain the topic with the help of aids.
- Tr. took various examples.
- Tr. solved example step by step.

सुधारात्मक बाबी

- Give sufficient time to student for answering the question.
- Use reinforcement according to question.
